

# Louisiana Administrative Code, Title 7 Part XXIX.

## Chapter 1. Horticulture

---

### I. Landscape Irrigation Contractor

1. Before the commission issues a landscape irrigation contractor license the person to be licensed shall first furnish to the commission a certificate of insurance, written by an insurance company authorized to do business in Louisiana, covering the public liability of the applicant, as a licensee, for personal injuries and property damages. The insurance policy shall provide for not less than \$25,000 per personal injuries and not less than \$50,000 for property damages, both limits applicable to each separate accident. The certificate of insurance must provide for 30 days' written notice to the commission prior to cancellation. The commission may, however, waive the requirement for the stated insurance coverage for any licensed landscape irrigation contractor who does not physically work on landscape irrigation systems or accept responsibility for work on landscape irrigation systems but only provides consultation or other associated services with respect to landscape irrigation systems or the work performed on such systems.
2. Licensees are required to attend and complete a commission approved continuing training seminar at least once every three years. Each licensee, prior to renewal of his or her license, shall provide the commission with certifiable evidence that the licensee has timely and successfully completed such a seminar.
3. Licensed landscape irrigation contractors shall enter into a written contract with the property owner, specifying the landscape irrigation services to be performed and the sum to be paid for the services. The contract shall include the following statement: "Any complaints regarding landscape irrigation installation should be directed to the Louisiana Horticulture Commission at 225/952-8100." Both parties shall receive a copy of the contract.
4. Licensees must display their license at all times in a location accessible to the general public or any representative of the commission.
5. The following clarifications apply to licensed landscape irrigation contractors.
  - a. A licensed landscape irrigation contractor is not required to have a water supply protection specialist endorsement from the State Plumbing Board in order to install an irrigation system up to the point of connecting the irrigation system to a public or private water supply system or installing a backflow prevention device.
  - b. A licensed landscape irrigation contractor shall also have a water supply protection specialist endorsement from the State Plumbing Board before connecting any irrigation system to a public or private water supply system or installing a backflow prevention device, pursuant to R.S. 3:3808(P)(4), (5).
  - c. A governing authority, such as a parish or municipality, shall issue all necessary permits, including necessary electrical permits, to a licensed landscape irrigation contractor who does not hold a water supply protection specialist endorsement for the installation of an irrigation system, except for those permits that would allow such a licensed landscape irrigation contractor to connect the irrigation system to a public or private water supply system or install a backflow prevention device.
  - d. A governing authority, such as a parish or municipality shall issue all necessary permits to a licensed landscape irrigation contractor who holds a water supply protection specialist endorsement from the State Plumbing Board for the installation of an irrigation system, including necessary electrical permits and those permits that would allow such a licensed landscape irrigation contractor to connect the irrigation system to a public or private water supply system or install a backflow prevention device.
  - e. A licensed landscape irrigation contractor who also holds a water supply protection specialist endorsement from the State Plumbing Board is required by R.S. 3:3816(6) to install backflow prevention devices in accordance with ordinances adopted by local governing authorities, such as parishes and municipalities, regulating the installation of backflow prevention devices. If a local governing authority does not have an ordinance regulating the installation of backflow prevention devices, such devices shall be installed in accordance with the requirements of Part XIV (Plumbing) of the Sanitary Code, State of Louisiana.
